DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 16-18, 20, 21, 27, 30, 31 and 32 are rejected under 35 U.S.C. 102(b) as being anticipated by Lanz (AT No. 401,868). Regarding claims 16 and 21, Lanz discloses a thumb splint for limiting angular motion of a thumb, formed from a single elongate strap of non-elastic material having a first surface and a second surface, said thumb splint comprising: a first loop (1) formed at a first end of said strap, by folding said end of strap onto said strap, parallel thereto, and affixing said end thereto, said first loop being dimensioned to accommodate a user's thumb, near the base thereof; a second loop (2) formed in said strap a predetermined distance from said first loop, by folding said strap substantially transversely over and onto itself and affixing said strap to itself at the point of intersection, said second loop being dimensioned to accommodate a user's index finger; and a positioning means (Figs. 2-3) between said first loop and said second loop to hold said first loop near the base of said user's thumb and said second loop to said user's index finger.

Regarding claim 17, Lanz discloses in Figs. 2-3 wherein said positioning means comprises an elongate portion of said strap extending from said second loop, of a length sufficient to diagonally cross a user's palm and wrap around a user's wrist.

Regarding claim 18, Lanz also discloses wherein said thumb splint is worn in conjunction with a glove, and said positioning component comprises webbing of said glove, wherein said webbing is located between a thumb and finger receiving portion of said glove (Lanz, page 4 and claim 7).

Regarding claims 20, 23, Lanz discloses wherein said thumb splint prevents said thumb moving away from said index finger beyond 100° to a position where a wearer could injure the thumb (Lanz, page 1).

Claims 24 and 26 are rejected under 35 U.S.C. 102(b) as being anticipated by Furr (U. S. Patent No. 5,188,356). Furr discloses a device comprising a thumb stabilizing component (Fig. 6), an index finger receiving section (31), a non-extendable flexible connector extending between the thumb section and index finger, an elongated strap formed from a single strip of webbing extending over a palm, wrist and back of a hand (Figs. 5-7) and velcro strips affixed to the elongated strap.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein

were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 19, 22, 25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lanz or Furr.

As discussed above Lanz or Furr discloses the claimed invention but fails to teach the specific materials recited. The choice of material is considered a matter of obvious design choice within the knowledge of the skilled artisan as one with ordinary skill in the art would select a material based upon its suitability for the intended use.

Claim 28-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lanz in view of Furr. As discussed above, Lanz discloses the claimed but fails to specifically teach the band of material is provided with releasable securing means to secure the band of material around a person's wrist. However, Furr, which also relates to a thumb splint, teaches that it is known to releasably secure the band about the user's wrist. Thus, it would have been obvious to one skilled in the art at the time of the invention to incorporate the releasable securing means of Furr into the thumb splint of Lanz in order to facilitate the ease of removing the splint.

Art Unit: 3743

Double Patenting

Claims 16 and 19 are rejected under the judicially created doctrine of double patenting over claims 1-2 of U. S. Patent No. 6,783,507 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: a first loop; a second loop and a positioning means

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dinnatia Doster-Greene whose telephone number is 571-272-7143. The examiner can normally be reached on 8:30-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Henry Bennett can be reached on 571-272-4791. The fax phone number for the organization where this application or proceeding is assigned is 571-273-7143.
